Negotiating a Democratic Space: Philosophy, Religion and the State

Overview

All the major philosophers in the western tradition have taken both religion and political organization very seriously in their examination of themes such as moral and political authority, law, and related issues. This course of seven lectures will address certain of the relevant questions as they arise in the context of Friedrich Nietzsche’s challenges to modernity, and will then examine a range of responses by noted modern thinkers who have been particularly influenced by Nietzsche or have drawn upon his work in pertinent ways. Where appropriate, implications for existing forms of authority will be outlined, through examples and discussion. The focus will be on the philosophic treatment of the relevant issues, and suitable readings will be set.

Participants will learn about the set topics through lectures, with time for discussion where possible.

   This book is in the IIT Madras Library.
